

Vision Area 4: Infectious Disease

Objective 20: Reduce new HIV infections among adults and adolescents

HIV is a significant and preventable public health problem. In 2009, 1,513 people were diagnosed with HIV in Maryland. An estimated 21% of people with HIV are undiagnosed. We have the knowledge and tools needed to slow the spread of HIV infection and improve the health of people living with HIV.

Statistics and Goals

Measure: Rate of newly diagnosed HIV cases (per 100,000 population)

Source: Maryland Infectious Disease and Environment Health Administration

National Baseline	Maryland Baseline	Healthy People 2020 Target	Maryland 2014 Target
Under development	32.0	N/A	30.4
